ElderCareAI Integration Testing

Forty visible-outcome cases, grouped by module and numbered in file order.

Proponent	Test Case ID	Module Name	Integration Process	Connected Module	Precondition	Expected Result	Actual Result	Result
	INT-001	Authentication Module	Route a signed-in caregiver with an incomplete profile.	Onboarding	Session exists; caregiver setup is incomplete.	Caregiver setup opens.	Jest PASS	Passed*
	INT-002	Authentication Module	Route a signed-in caregiver after all setup steps.	Home	Session and onboarding are complete.	Home route opens.	Jest PASS	Passed*
	INT-003	Authentication Module	Open admin sign-in and recovery.	Admin recovery	Portal is available.	Sign-in and reset-code forms appear.	Source PASS	Passed*
	INT-004	Health Monitoring and Analytics Module	Display synchronized heart rate and oxygen.	Health Vitals	Patient has a saved vital reading.	Health shows both measurements.	Jest PASS	Passed*
	INT-005	Health Monitoring and Analytics Module	Interpret recorded sleep duration.	Health Vitals	Latest sleep duration is 5.5 hours.	Health shows the below-guide context label.	Jest PASS	Passed*
	INT-006	Health Monitoring and Analytics Module	Analyze low blood oxygen.	Health Insights	Latest SpO_2 is 92%.	Attention insight appears.	Jest PASS	Passed*
	INT-007	Health Monitoring and Analytics Module	Request a trend with limited history.	Health Predictions	Only two distinct readings exist.	Prediction remains pending.	Jest PASS	Passed*
	INT-008	Health Monitoring and Analytics Module	Project a trend from saved readings.	Health Predictions	Four distinct readings exist.	Heart-rate trend card appears.	Jest PASS	Passed*
	INT-009	Health Monitoring and Analytics Module	Flag abnormal readings.	Health Anomalies	Latest heart rate is 118 bpm and SpO_2 is 92%.	Both thresholds appear as anomalies.	Jest PASS	Passed*
	INT-010	Health Monitoring and Analytics Module	Export patient-scoped readings.	PDF Reports	Patient has synchronized vital history.	PDF contains patient and reading data and opens sharing.	Jest PASS	Passed*
	INT-011	Health Monitoring and Analytics Module	Supabase returns saved readings and a new event.	Analytics chart	Controlled test fixture exists	Actual values, timestamps and live updates appear; foreign rows are omitted.	Jest PASS	Passed*
	INT-012	Health Monitoring and Analytics Module	Daily step RPC returns a saved total, then a higher update.	Daily history	Controlled test fixture exists	One displayed day changes to the new total without double-counting.	Jest PASS	Passed*
	INT-013	Health Monitoring and Analytics Module	Open vitals and saved analytics.	Date-filtered chart	A patient has saved readings.	Health cards and analytics date filter appear.	Source PASS	Passed*
	INT-014	Health Monitoring and Analytics Module	Select a health record from the chart.	Recorded detail	Saved readings exist.	Chart selection and original reading time appear.	Source PASS	Passed*
	INT-015	Medication and Care Plan Module	Show an as-needed medication in the care plan.	Dose Status	As-needed schedule is saved.	Medication and as-needed status appear.	Jest PASS	Passed*
	INT-016	Medication and Care Plan Module	Apply a taken log to a saved schedule.	Dose Status	Today's taken log matches the medication.	Care plan shows Taken today.	Jest PASS	Passed*
	INT-017	Medication and Care Plan Module	Save an as-needed medication.	Medication Schedules	Caregiver enters a medication name.	Schedule saves with no timed notification.	Jest PASS	Passed*
	INT-018	Medication and Care Plan Module	Record a medication dose.	Medication Logs	Active schedule is visible.	Taken log saves and status refreshes.	Jest PASS	Passed*
	INT-019	Medication and Care Plan Module	Export patient medication entries.	PDF Reports	Medication schedule exists.	PDF contains the medication and instructions and opens sharing.	Jest PASS	Passed*
	INT-020	Medication and Care Plan Module	Caregiver edits extracted text, adds a photo and confirms.	Medication save	Controlled test fixture exists	No medication saves before confirmation; corrected fields are saved.	Jest PASS	Passed*
	INT-021	Medication and Care Plan Module	Load past, future and completed visits into Schedule.	Appointments	Controlled test fixture exists	Upcoming visits sort by date/time and completed activity is separate.	Jest PASS	Passed*
	INT-022	Medication and Care Plan Module	Add a medication with a reminder time.	Care plan	Patient is selected.	Editor time control and Care plan medication tab are visible.	Source PASS	Passed*
	INT-023	Medication and Care Plan Module	Choose a medication image and review schedule.	Medication card	Medication editor is open.	Image picker and medication card are visible.	Source PASS	Passed*
	INT-024	Medication and Care Plan Module	Scan a prescription and review its draft.	Medication editor	Caregiver selects a prescription.	Scan entry and original-prescription review appear.	Source PASS	Passed*
	INT-025	Appointments and Reminders Module	Save a future visit.	Notifications	Caregiver enters a visit title and doctor.	Patient-named appointment reminder is scheduled.	Jest PASS	Passed*
	INT-026	Appointments and Reminders Module	Load a scheduled future visit.	Notifications	Visit and notification permission exist.	Appointment reminder includes patient, doctor, and clinic.	Jest PASS	Passed*
	INT-027	Appointments and Reminders Module	Open appointments and see reminder details.	Appointment alert	A future visit is saved.	Appointment form and notification details are available.	Source PASS	Passed*

Proponent	Test Case ID	Module Name	Integration Process	Connected Module	Precondition	Expected Result	Actual Result	Result
	INT-028	Elle Assistant Module	Handle an assistant service failure.	Chat Persistence	AI endpoint returns an error.	Friendly error appears; no false reply is saved.	Jest PASS	Passed*
	INT-029	Elle Assistant Module	Follow a medication action in an assistant reply.	Care Navigation	Reply mentions the medication schedule.	Open Meds routes to the medication tab.	Jest PASS	Passed*
	INT-030	Emergency and Alerts Module	Two local care reminders fire together while app is open.	Foreground queue	Controlled test fixture exists	Medication and appointment each show a separate popup and play audio.	Jest PASS	Passed*
	INT-031	Emergency and Alerts Module	Open contact priority and choose caregiver.	Dial action	Controlled test fixture exists	Priority list appears and only selected number opens the dialer.	Jest PASS	Passed*
	INT-032	Emergency and Alerts Module	Expand vital rules and open alert details.	Alert response	A saved alert exists.	Rules and alert response screen are visible.	Source PASS	Passed*
	INT-033	Location and Safety Module	Open patient safe zone.	Live location	Watch location exists.	Radius controls and live map are visible.	Source PASS	Passed*
	INT-034	Location and Safety Module	Set a safe zone and view watch movement.	Live map	Watch has a location fix.	Radius control and map follow control appear.	Source PASS	Passed*
	INT-035	Galaxy Watch6 Module	Open the watch pairing screen from phone setup.	Phone pairing	Watch is not yet paired.	Phone setup and watch code entry are both visible.	Source PASS	Passed*
	INT-036	Galaxy Watch6 Module	Start monitoring on the paired watch.	Phone vitals	Watch is paired and app is signed in.	Watch monitoring control and phone vital cards are visible.	Source PASS	Passed*
	INT-037	Galaxy Watch6 Module	Open Medications on watch.	Dose confirmation	A dose is scheduled.	Watch shows Taken control and care plan shows medication status.	Source PASS	Passed*
	INT-038	Galaxy Watch6 Module	Open watch oxygen and phone oxygen card.	Blood oxygen	Watch monitoring is active.	Spot-check control and phone oxygen card appear.	Source PASS	Passed*
	INT-039	Administration Module	Open admin system monitor.	Saved health sync	Admin has signed in.	Overview and recent sync sections are visible.	Source PASS	Passed*
	INT-040	Administration Module	Open account and security management.	Admin security	Admin is signed in.	Account records and security controls appear.	Source PASS	Passed*

* Automated pass is separate from a live screenshot. Source checks do not prove device delivery or backend behavior.
