Table 29

VIEW SYSTEM OVERVIEW

Use Case Name	View System Overview	
Actor	Administrator	
Brief Description	The administrator reviews current account, synchronization, alert, emergency, and administrative activity summaries.	
Trigger	An authenticated administrator opens Overview.	
Pre-Conditions	An active administrator session exists.	
Post Conditions	Current summary counts and recent saved activity are displayed with a refresh time.	
Flow of Activities	**Actor(s)**	**Application**
	1. Open Overview. 4. Review the available summary cards and recent activity. 5. Select an account, monitor, emergency, report, or security page. 7. Return to Overview and request a refresh when needed.	2. Load current account counts, access status, recent synchronization records, alerts, emergencies, and audit activity. 3. Display the summary cards, recent activity, and refresh time. Show zero counts or empty states when a category has no records. 6. Open the selected management page. 8. Load and display the latest saved data and update the refresh time. If refresh fails, preserve the last displayed data and show an error.
