ElderCareAI System Storyboard

This storyboard documents the main caregiver phone screens, Galaxy Watch6 screens, and administrator web screens. Each figure box identifies the screenshot to insert. The items and logic describe the current system at a general level; live screenshots should show the installed build and real demonstration records.

Module Name: Authentication Module

Screen No: 1

Screen Name: Phone sign in

Description: Caregivers start a Google sign-in session and continue to their saved profile or onboarding.

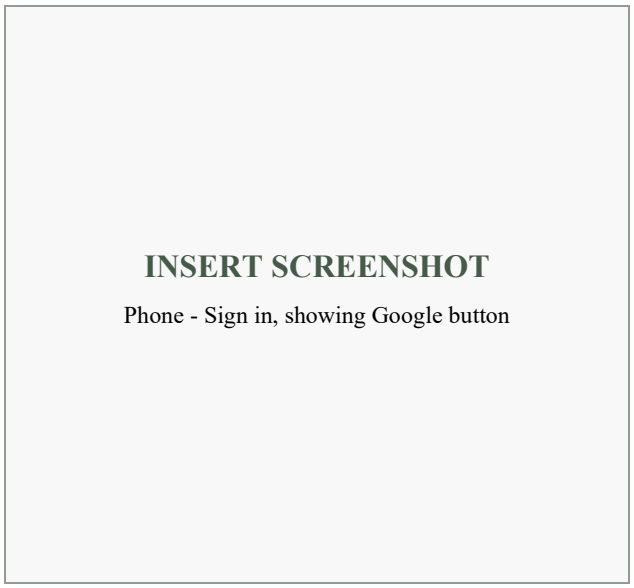

Figure 1: **Phone sign in**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Google sign-in	Button	Yes	OAuth action	N/A
Status or error	Text	No	VARCHAR	N/A

Logic:

1. Tap Google sign-in.
2. If sign-in succeeds, continue to the matching caregiver setup step or Home.
3. If sign-in fails, show an error and remain on the sign-in screen.

Module Name: Onboarding Module

Screen No: 2

Screen Name: Caregiver setup

Description: The caregiver enters their own profile details before adding an older adult.

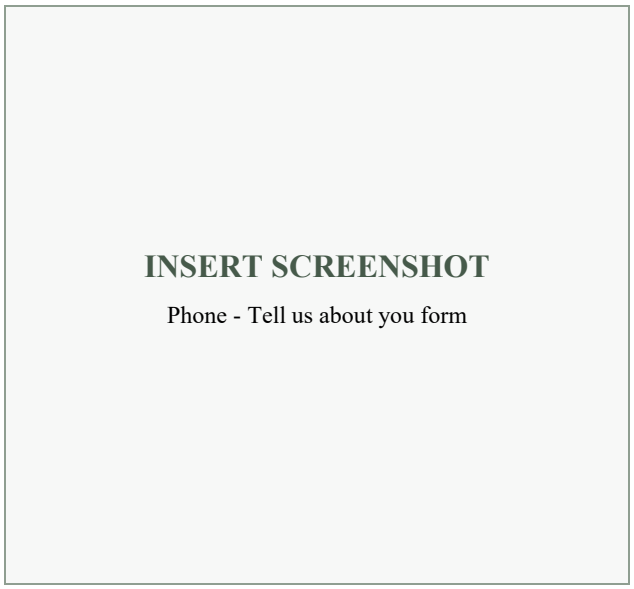

Figure 2: **Caregiver setup**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Full name	Textbox	Yes	VARCHAR	120
Phone number	Textbox	Yes	VARCHAR	40
Age and profile details	Input fields	As shown	Mixed	N/A
Continue	Button	Yes	Action	N/A

Logic:

1. Enter required caregiver details.
2. Invalid or missing details keep the user on the form with field feedback.
3. A valid save advances to older-adult setup.

Module Name: Onboarding Module

Screen No: 3

Screen Name: Older adult setup

Description: The caregiver records the selected older adult and emergency contact information.

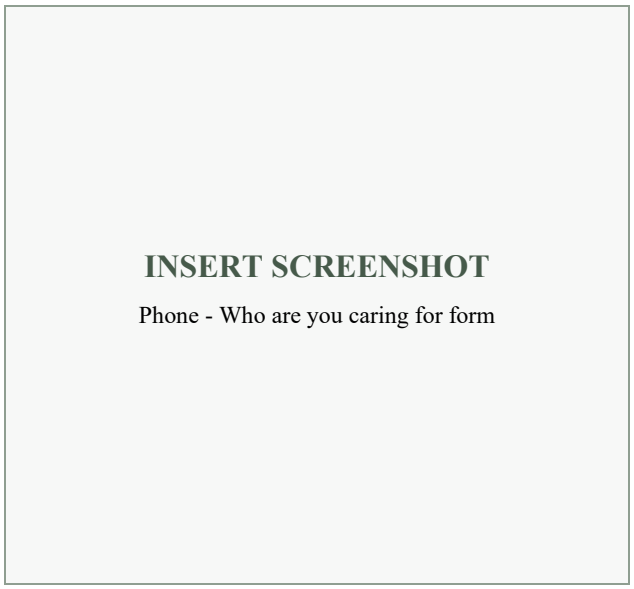

Figure 3: **Older adult setup**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Name and birth date	Input fields	Yes	VARCHAR / DATE	N/A
Health profile	Input fields	As shown	Mixed	N/A
Emergency contact	Textbox	Yes	VARCHAR	N/A
Continue	Button	Yes	Action	N/A

Logic:

1. Enter the older adult and emergency contact details.
2. Correct invalid or missing fields before saving.
3. A successful save advances to watch connection.

Module Name: Wearable Connection Module

Screen No: 4

Screen Name: Galaxy Watch6 connection

Description: A watch is paired to the selected patient profile so measurements and location belong to the right person.

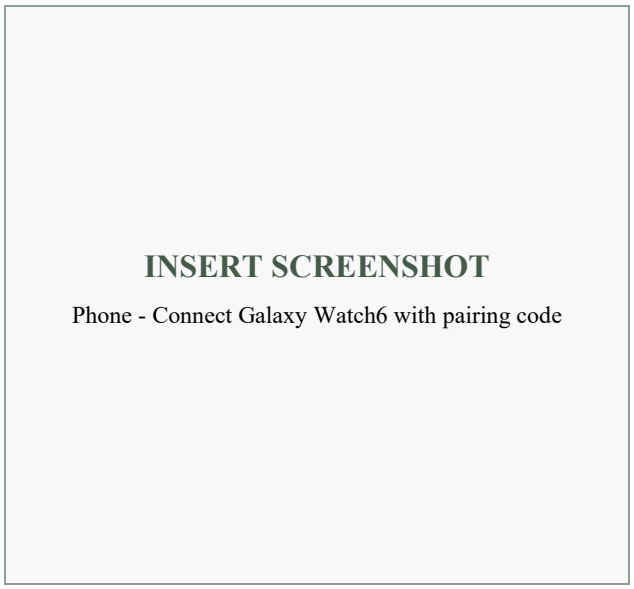

Figure 4: **Galaxy Watch6 connection**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Pairing code	Code display	Yes	CHAR	8
Watch connection	Status	Yes	ENUM	N/A
Pair or continue	Button	Yes	Action	N/A

Logic:

1. Generate or display the pairing code on the phone.
2. Enter the same code in ElderCareAI on the Galaxy Watch6.
3. Show connection status after the watch claims the code.

Module Name: Galaxy Watch6 Module

Screen No: 5

Screen Name: Watch monitoring

Description: The watch starts a foreground monitoring session and displays the most recent available measurements.

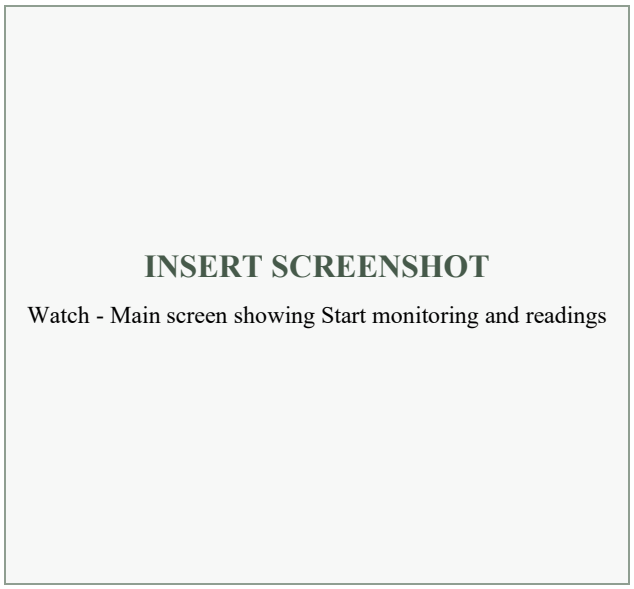

Figure 5: **Watch monitoring**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Start monitoring	Button	Yes	Action	N/A
Heart rate	Reading	When available	NUMERIC	bpm
Other readings	Cards	When available	NUMERIC	N/A
Location status	Status	Yes	Text	N/A

Logic:

1. Tap Start monitoring and grant watch permissions.
2. The watch displays measured values and their age as they arrive.
3. Location and sharing status reflect the watch session; a network connection is needed to upload.

Module Name: Galaxy Watch6 Module

Screen No: 6

Screen Name: Blood oxygen spot check

Description: The wearer can request a foreground SpO2 spot check; optional repeat checks require this screen to remain open.

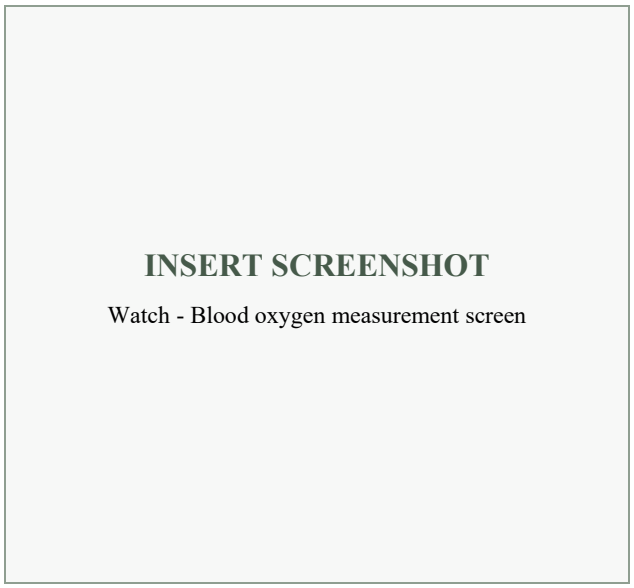

Figure 6: **Blood oxygen spot check**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Measure blood oxygen	Button	Yes	Action	N/A
SpO2 result	Reading	When available	NUMERIC	%
Auto checks	Switch	No	BOOLEAN	N/A

Logic:

1. Start monitoring before opening the oxygen screen.
2. Keep the watch snug and remain still during the spot check.
3. Show the result when the sensor succeeds; leaving the screen stops optional auto checks.

Module Name: Caregiver Dashboard Module

Screen No: 7

Screen Name: Home dashboard

Description: The dashboard summarizes the selected older adult, latest saved readings, and current care tasks.

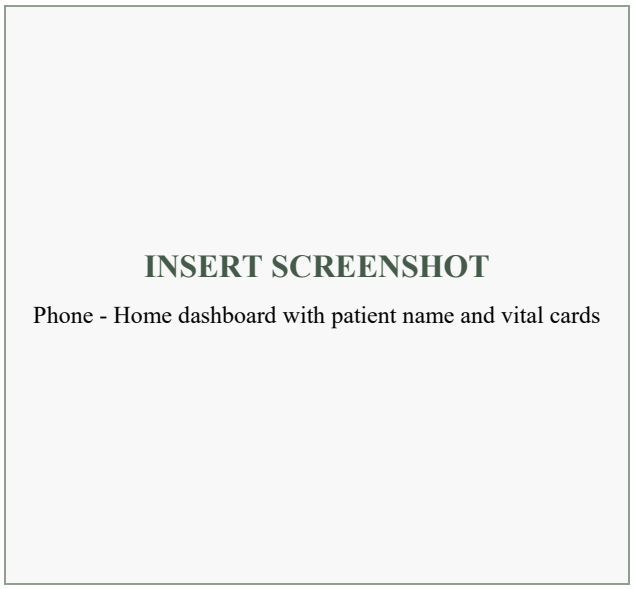

Figure 7: **Home dashboard**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Patient name	Text	Yes	VARCHAR	N/A
Vital cards	Cards	When available	NUMERIC	N/A
Care previews	List	When available	OBJECT	N/A
Sync now	Button	No	Action	N/A

Logic:

1. Load only the selected patient record.
2. Display each available reading with status text and measurement time.
3. Open the corresponding health or care detail when a card is tapped.

Module Name: Health Monitoring Module

Screen No: 8

Screen Name: Vitals

Description: The Health screen displays heart rate, blood oxygen, sleep, steps, wrist temperature, and the stress estimate when recorded.

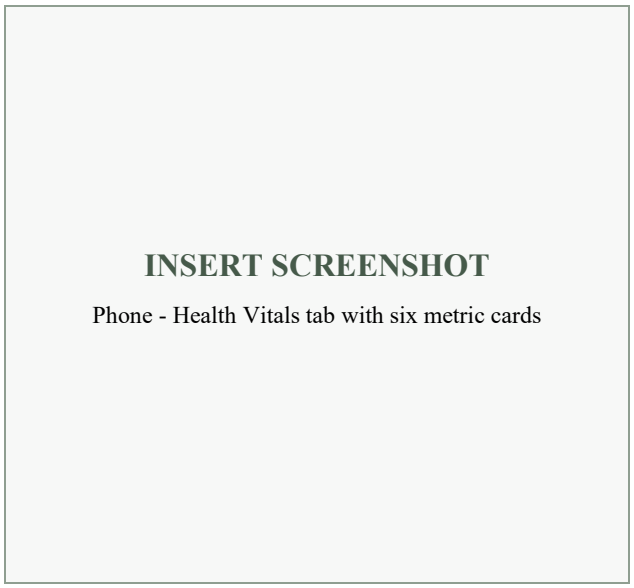

Figure 8: **Vitals**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Metric value	Card	When available	NUMERIC	N/A
Status label	Text	Yes	VARCHAR	N/A
Measured time	Text	When available	TIMESTAMP	N/A
Metric detail	Tap action	No	Action	N/A

Logic:

1. Read saved and newly received measurements for the selected patient.
2. Show readable status labels alongside colors; show no reading when data is absent.
3. Tap a metric to inspect its detail and history.

Module Name: Health Monitoring Module

Screen No: 9

Screen Name: Vital detail

Description: The detail view provides the latest value, its recorded time, status, and available history or source context.

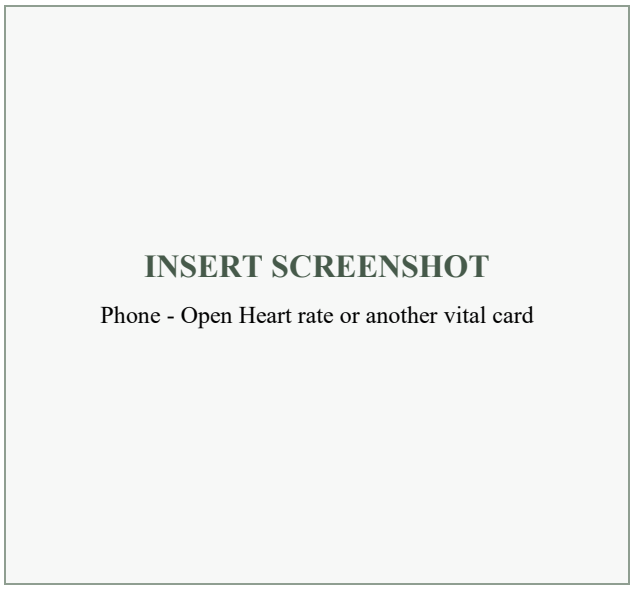

Figure 9: **Vital detail**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Latest value	Reading	When available	NUMERIC	N/A
Status and context	Text	Yes	VARCHAR	N/A
History	List	When available	OBJECT	N/A
Close	Button	Yes	Action	N/A

Logic:

1. Open a vital card.
2. Display the selected metric and real saved readings only.
3. Close the detail to return to the dashboard or Health screen.

Module Name: Health Analytics Module

Screen No: 10

Screen Name: Monitoring analytics

Description: Caregivers can view measured trends and records within a chosen date range.

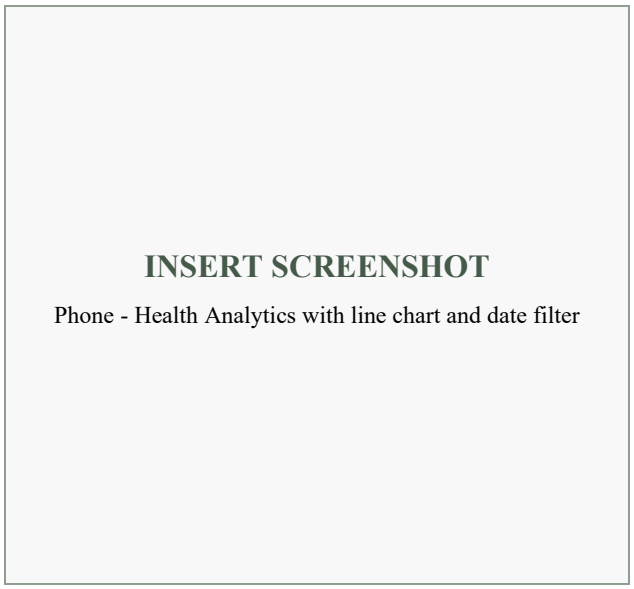

Figure 10: **Monitoring analytics**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Date range	Date pickers	Yes	DATE	N/A
Line or bar chart	Chart	When data exists	OBJECT	N/A
Summary statistics	Text	When data exists	NUMERIC	N/A
Record list	List	When data exists	OBJECT	N/A

Logic:

1. Choose a metric and date range.
2. Load matching database records and display their timestamps.
3. Switch line or bar mode and inspect a plotted reading.

Module Name: Health Analytics Module

Screen No: 11

Screen Name: Insights and anomalies

Description: The app presents general wellness context and flags readings that match its review rules.

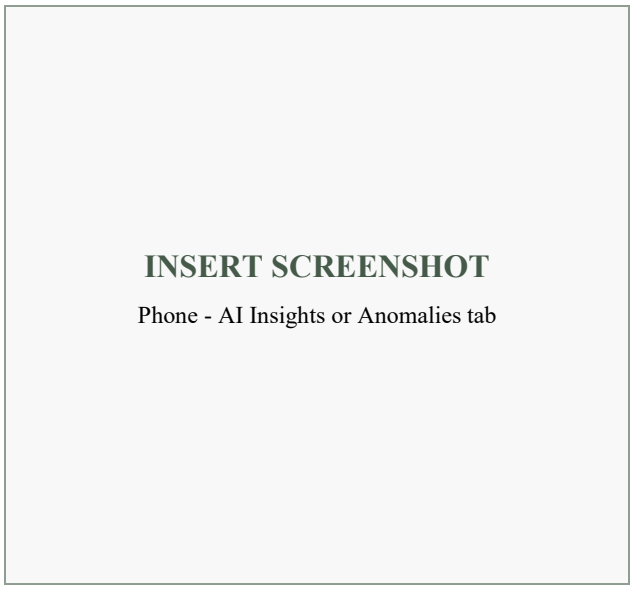

Figure 11: **Insights and anomalies**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Insight cards	Cards	When data exists	OBJECT	N/A
Status label	Text	Yes	VARCHAR	N/A
Measurement time	Text	When data exists	TIMESTAMP	N/A
Advice note	Text	Yes	VARCHAR	N/A

Logic:

1. Analyze only available recorded data.
2. Display a waiting state when data is insufficient.
3. Show concerning readings as review guidance, without presenting a medical diagnosis.

Module Name: Health History Module

Screen No: 12

Screen Name: Health records and sleep sync

Description: Recorded health history, checkups, and sleep import are shown for the selected older adult.

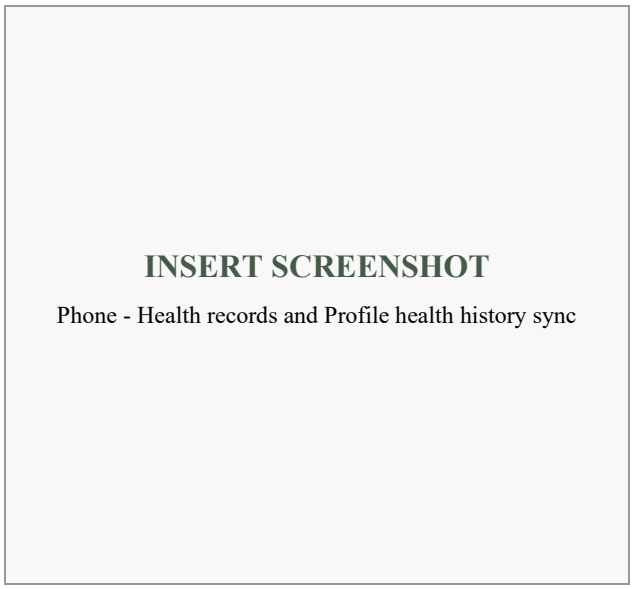

Figure 12: **Health records and sleep sync**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Saved records	List	When available	OBJECT	N/A
Sleep session	Record	When available	NUMERIC	hours
Sync health history	Button	No	Action	N/A

Logic:

1. Open saved health history or trigger the health-history sync.
2. Import available sleep records from the paired patient watch through the phone.
3. Show saved history and a clear empty or error state when records are unavailable.

Module Name: Location and Safety Module

Screen No: 13

Screen Name: Live location and safe zone

Description: The map displays the selected watch route and a caregiver-set safe zone.

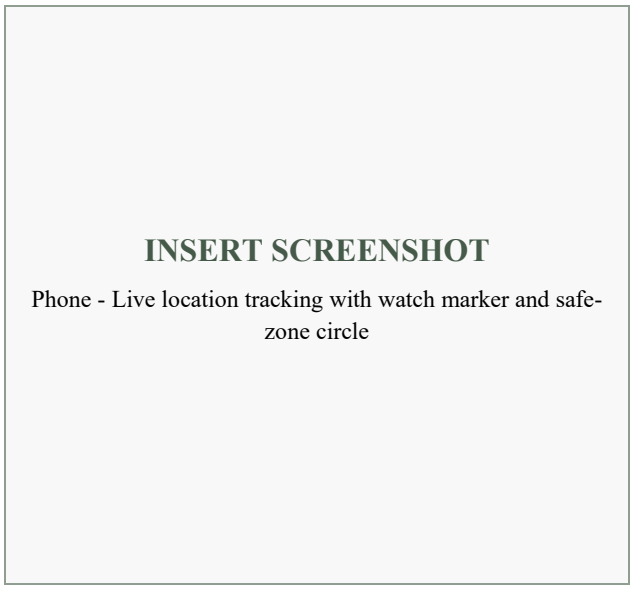

Figure 13: **Live location and safe zone**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Watch marker	Map marker	When available	COORDINATE	N/A
Safe-zone center	Map control	Yes	COORDINATE	N/A
Radius	Control	Yes	INTEGER	meters
Location age	Text	When available	DURATION	N/A

Logic:

1. Start watch monitoring and keep watch internet available.
2. Place the safe-zone center and choose a radius.
3. Update the marker from accepted watch positions; show waiting or stale status when no fresh fix exists.

Module Name: Care Plan Module

Screen No: 14

Screen Name: Medications

Description: Caregivers can view scheduled medicines, dose status, image, and actions.

Figure 14: **Medications**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Medication image	Image	No	FILE	N/A
Name and dosage	Text	Yes	VARCHAR	N/A
Reminder time	Text	If scheduled	TIME	12-hour
Taken, Edit, Delete	Buttons	Yes	Action	N/A

Logic:

1. Open the selected patient medication list.
2. Add or edit a schedule with caregiver-confirmed details.
3. Mark a dose Taken and show the updated status on the card.

Module Name: Care Plan Module

Screen No: 15

Screen Name: Prescription review

Description: An uploaded prescription produces an editable draft that the caregiver checks against the original before saving.

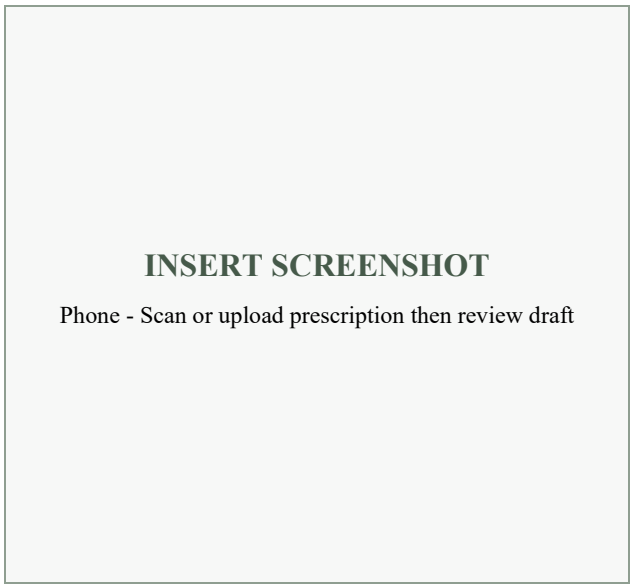

Figure 15: **Prescription review**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Prescription image	Image	Yes	FILE	N/A
Extracted fields	Form	When found	VARCHAR	N/A
Confirmation	Checkbox	Yes	BOOLEAN	N/A
Save medication	Button	Yes	Action	N/A

Logic:

1. Capture or select the original prescription.
2. Review and correct every extracted field, including time and dosage.
3. Confirm against the original before the medication schedule is saved.

Module Name: Care Plan Module

Screen No: 16

Screen Name: Appointments and schedule

Description: Appointments and care tasks are displayed in time order with upcoming and completed states.

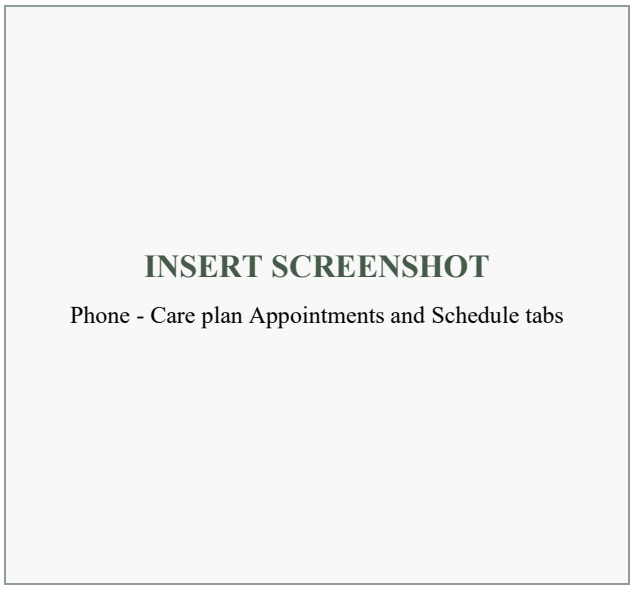

Figure 16: **Appointments and schedule**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Appointment details	Form or card	Yes	VARCHAR	N/A
Date and time	Picker or text	Yes	DATETIME	N/A
Schedule timeline	List	When available	OBJECT	N/A
Reminder	Notification	When enabled	Action	N/A

Logic:

1. Create an appointment with patient, purpose, date, and time.
2. Sort saved activities by their scheduled date and time.
3. Show the reminder at its due time when permissions and delivery are available.

Module Name: Alerts and Emergency Module

Screen No: 17

Screen Name: Alerts and SOS

Description: Caregivers review vital alerts and SOS requests and can contact priority people.

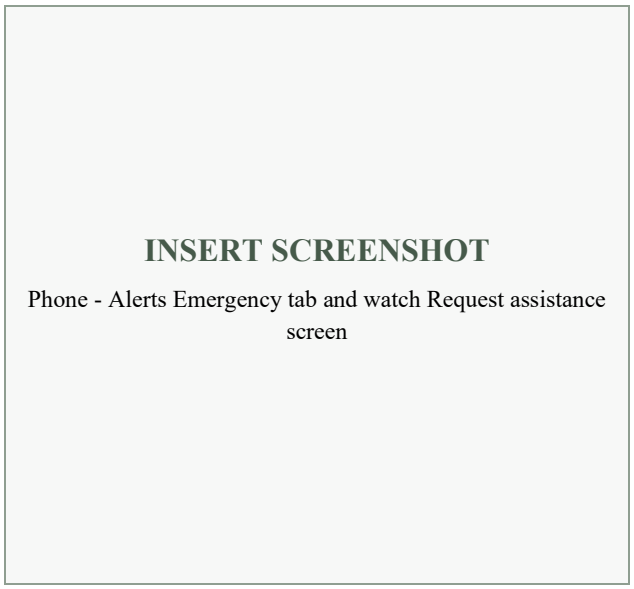

Figure 17: **Alerts and SOS**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Alert list	List	When available	OBJECT	N/A
SOS	Button	Yes	Action	N/A
Priority contacts	List	When saved	VARCHAR	N/A
Respond or resolve	Button	When available	Action	N/A

Logic:

1. A watch SOS requires explicit confirmation; phone SOS also asks for confirmation.
2. A new event appears in the caregiver alert history and may notify the phone when push is configured.
3. Caregiver reviews the event, contacts the appropriate person, and records a response.

Module Name: Elle Assistant Module

Screen No: 18

Screen Name: Elle care assistant

Description: Elle summarizes available care data and provides navigation to related app screens.

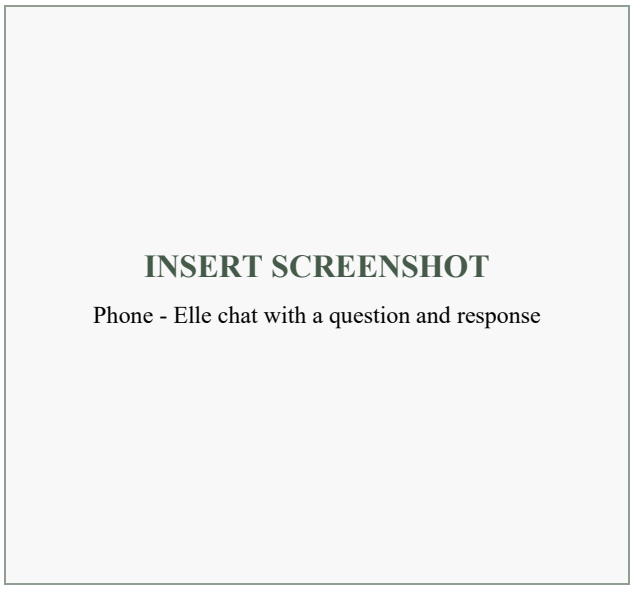

Figure 18: **Elle care assistant**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Question input	Textbox	Yes	VARCHAR	N/A
Send	Button	Yes	Action	N/A
Response	Message	When available	TEXT	N/A
Related action	Button	When available	Action	N/A

Logic:

1. Enter or select a question.
2. Show the reply or a service error; do not invent unavailable patient readings.
3. Open a related care screen when an action appears.

Module Name: Settings and Reports Module

Screen No: 19

Screen Name: Profile and exports

Description: Settings contain account and patient information, integrations, emergency contacts, and PDF export actions.

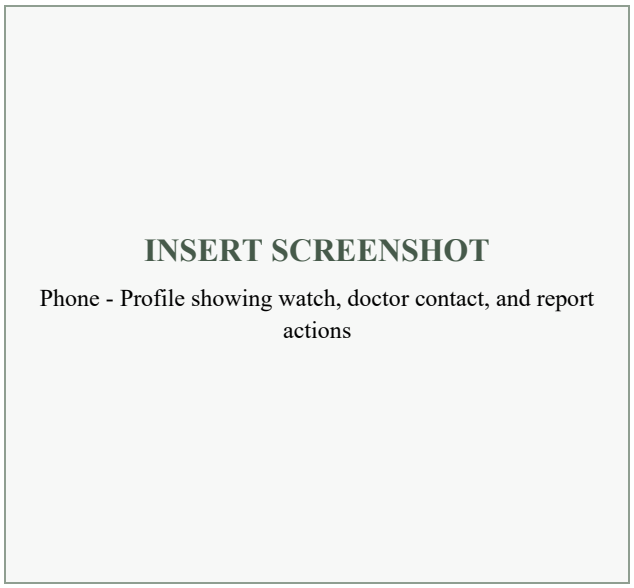

Figure 19: **Profile and exports**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Account and patient	Cards	Yes	OBJECT	N/A
Doctor contact	Card	When saved	VARCHAR	N/A
Health PDF	Button	No	Action	N/A
Medication PDF	Button	No	Action	N/A

Logic:

1. Open the caregiver profile and selected patient information.
2. Manage available contacts and watch connection.
3. Choose a report and share the generated PDF when data is available.

Module Name: Administration Module

Screen No: 20

Screen Name: Admin sign in and overview

Description: An authorized administrator signs in to review high-level account and health-activity information.

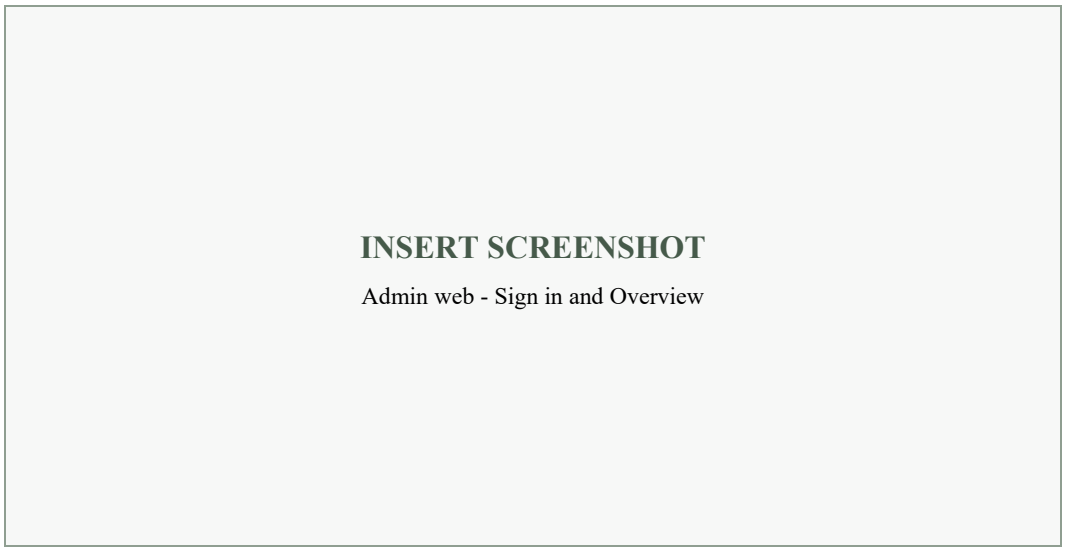

Figure 20: **Admin sign in and overview**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Username or email	Textbox	Yes	VARCHAR	254
Password	Textbox	Yes	VARCHAR	N/A
Overview metrics	Cards	After sign in	INTEGER	N/A
Recent activity	Lists	When available	OBJECT	N/A

Logic:

1. Enter administrator credentials on the web portal.
2. Reject invalid access with a visible message.
3. After authorization, show the Overview with saved system metrics.

Module Name: Administration Module

Screen No: 21

Screen Name: Admin accounts and monitor

Description: The administrator reviews caregiver and older-adult records and recent saved syncs.

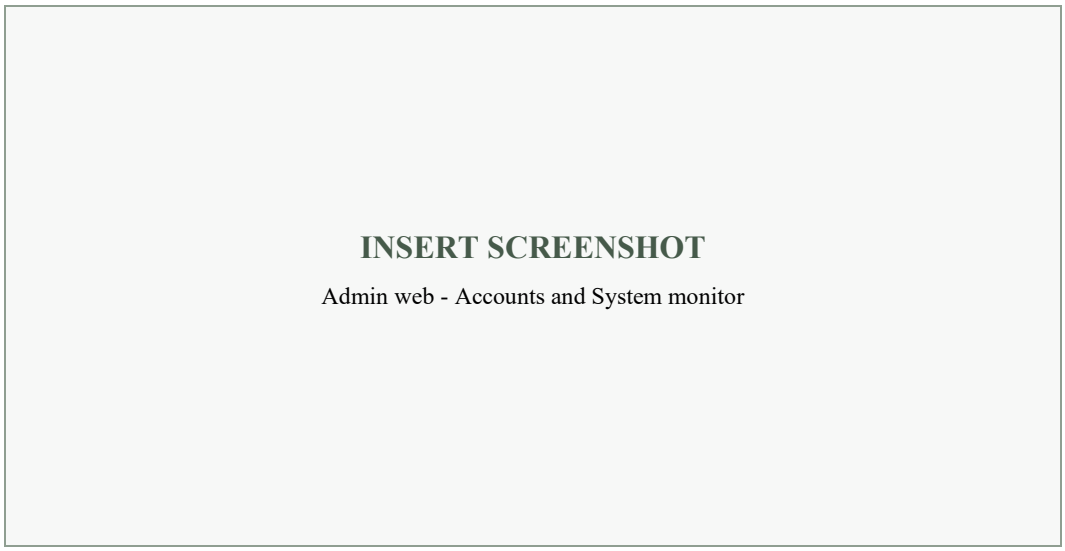

Figure 21: **Admin accounts and monitor**

ITEMS	TYPE	REQUIRED?	DATA TYPE	SIZE
Caregiver accounts	Table	When available	OBJECT	N/A
Older adult profiles	Table	When selected	OBJECT	N/A
Connected devices	Table	When available	OBJECT	N/A
Recent health syncs	Table	When available	OBJECT	N/A

Logic:

1. Open Accounts to inspect linked profiles.
2. Open System monitor to review connection state and recent database writes.
3. Use Reports or Alerts and notifications for more detail as needed.

Screenshot Capture Checklist

Replace each gray figure box with the screen named below. Use the same patient account throughout a demonstration. Hide personal names, phone numbers, medical notes, tokens, and exact home coordinates before sharing the document.

1. Figure 1. Phone - Sign in, showing Google button
2. Figure 2. Phone - Tell us about you form
3. Figure 3. Phone - Who are you caring for form
4. Figure 4. Phone - Connect Galaxy Watch6 with pairing code
5. Figure 5. Watch - Main screen showing Start monitoring and readings
6. Figure 6. Watch - Blood oxygen measurement screen
7. Figure 7. Phone - Home dashboard with patient name and vital cards
8. Figure 8. Phone - Health Vitals tab with six metric cards
9. Figure 9. Phone - Open Heart rate or another vital card
10. Figure 10. Phone - Health Analytics with line chart and date filter
11. Figure 11. Phone - AI Insights or Anomalies tab
12. Figure 12. Phone - Health records and Profile health history sync
13. Figure 13. Phone - Live location tracking with watch marker and safe-zone circle
14. Figure 14. Phone - Care plan Medications tab with a saved medication card
15. Figure 15. Phone - Scan or upload prescription then review draft
16. Figure 16. Phone - Care plan Appointments and Schedule tabs
17. Figure 17. Phone - Alerts Emergency tab and watch Request assistance screen
18. Figure 18. Phone - Elle chat with a question and response
19. Figure 19. Phone - Profile showing watch, doctor contact, and report actions
20. Figure 20. Admin web - Sign in and Overview
21. Figure 21. Admin web - Accounts and System monitor
